## EVALUATION OF JOB SATISFACTION IN TERMS OF THE NATIONAL ECONOMY OF BELARUS

**Abstract.** Presents the results of the evaluation of satisfaction with employment in the national economy of Belarus using methodological approaches «Russian monitoring of the economic situation and the HSE health.» Considered the notion of «satisfaction with labour in the modern economy. The evaluation was conducted according to a survey of employees of Belarusian enterprises. Descriptive sampling statistics provided depending on the level of workload on the individual. Identified the nature of the relationships of satisfaction with pay and degrees of dissatisfaction in general working conditions, opportunities for professional growth. It is revealed that in the context of the Belarusian economy is broken primary market principle «more work-more income»

**Keywords:** job satisfaction, work load.
